Ⅲ. ICH Practitioners, Groups and Communities

The survey has not been able to get comprehensive record of ICH practitioners, groups, communities. This is because so far no organizations (both government and non-government) have carried out complete documentation of ICH elements in the country, hence full record of practitioners are not available.

At present, the organizations which devote full time to the documentation/inventory of ICH are:

1) National Library and Archives
2) College of Language and Cultural Studies
3) Shejun Agency for Bhutan's Cultural Documentation and Research
4) The Music of Bhutan Research Centre and
5) Bhutan Oral Literature Project: Culture, Language, Environment

Once these organizations have completed their documentation works within their stipulated timeframe, details of ICH elements, practitioners, groups or communities are expected to be available.
