1. Introduction

Intangible cultural heritage (ICH), which is the source of human creativity and cultural diversity, has been diminishing since the onset of globalisation and urbanisation. In this regard, international society, working in tandem with UNESCO, has garnered public attention on ICH safeguarding, and the Convention for the Safeguarding of the Intangible Cultural Heritage was adopted in 2003.

According to Article 13, d.iii of the 2003 Convention, States Parties should establish documentation institutions for ICH and facilitate access to them to ensure the safeguarding, development, and promotion of ICH present in each State Party's territory. This is to say, the Convention encourages managing an institute related to information building and sharing—one that collects, produces, and disseminates ICH information.

The process of ICH information building and sharing could be the cornerstone to safeguarding ICH. However, as with most kinds of information activities in other fields, the process of ICH information building and sharing includes many intellectual property (IP) issues.

Many problems could arise while collecting and creating ICH information, while processing and producing ICH information, and while disseminating and utilising ICH information. Additional, diverse problems could also develop from the communities, institutes, or individuals involved in the process.

In particular, with the development of technology and the appearance of new media, ICH intellectual property issues can manifest themselves in many ways, and these problems have expanded into much more complicated arenas.

The International Information and Networking Centre for Intangible Cultural Heritage in the Asia-Pacific Region under the auspices of UNESCO (ICHCAP) has been concerned with IP issues related to ICH information building and sharing. To cope with these concerns, ICHCAP has endeavoured to develop a guideline for protecting IP in the process of ICH information building and sharing.

ICHCAP has proposed a project for a field survey to examine IP issues, focusing on activities of ICH information-related institutes in the Asia-Pacific region and on cases about how to deal with problems that arise in the process of ICH information building and sharing.

The survey is expected to contribute by allowing an exchange of experiences and know-how in the Asia-Pacific region to foster an environment to understand and resolve problems related to IP aspects of ICH. Furthermore, the survey results could be the foundation for developing a guideline for protecting IP rights during ICH information building and sharing.

2. Glossary

For the current survey, the terms below will have the given meanings.
